The U.S. President's Emergency Plan for AIDS Relief and The Global Fund to Fight AIDS, Tuberculosis, and Malaria

Together, The U.S. President's Emergency Plan for AIDS Relief (PEPFAR) and The Global Fund to Fight AIDS, Tuberculosis, and Malaria (GFATM) account for over 90% of donor funding for HIV/AIDS response in the world's highest-burden and lowest-resourced countries.

PEPFAR

PEPFAR is the U.S. Government response to HIV/AIDS around the world. This historic commitment is the largest by any nation to combat a single disease internationally. PEPFAR investments also help alleviate suffering from other diseases across the global health spectrum. PEPFAR is driven by a shared responsibility among donor and partner nations and others to make smart investments to save lives.

The Global Fund

Founded in January 2002 as an independent, non-profit foundation, GFATM operates as a financing instrument — not as implementer — to attract and disburse resources to prevent and treat the three diseases. GFATM is a unique funding model that relies on partnerships among governments; civil society, including community and faith-based organizations; international organizations; bilateral and multilateral donors; the private sector; and affected communities in the fight against AIDS, tuberculosis, and malaria.
